Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 56, 58. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Liang.

The structure as claimed is fully anticipated by Liang (note Figs. 2-3).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4, 7-11, 14, 17-21, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liang in view of Spikes.

Spikes shows in Fig. 1 a combustion heater, comprising: a combustion chamber (10); and a reflector (55) connected to the combustion heater and movable between a first position and a second position adjacent the combustion chamber. This particular arrangement shown by Spikes is used for the purpose of directing heat emanating from the combustion chamber in either a first position or a second position (note page 2, col. 2, lines 29-38).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the reflector of Liang in the manner as taught by Spikes in order to direct heat emanating from the combustion chamber in either a first position or a second position.

6. Claims 5-6, 12-13, and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liang in view of Spikes as applied to claim 1 above, and further in view of Hader.

Hader teaches the use of a handle (11c, Fig. 1) for the purpose of facilitate the lifting of a heater (page 2, line 10).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the heater of Liang with a handle such as taught by Hader in order to facilitate the lifting of the heater.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Duriez (France Pat. 599295) is cited to show a combustion gas heater having a movable reflector for directing heat emanating from the heater in any desired direction.

Parkinson (U.K. Pat. 403490) is cited to show a combustion heater having a movable reflector for directing heat emanating from the heater in any desired direction.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James C Yeung whose telephone number is 703 308-1047.
